Understanding Aimyze Agent Marketplace

Version 1.0 | December 2025

1. Introduction

The Aimyze Agent Marketplace offers a curated selection of pre-built agents and skills designed for various enterprise use cases. This document provides an overview of the marketplace, including how to utilize available agents and the future roadmap for partner contributions.

2. Marketplace Overview

The Aimyze Agent Marketplace is designed to accelerate time-to-value by providing:

- Pre-built agents for common enterprise use cases
- Industry-specific agent templates
- Skills and capabilities that extend agent functionality
- Certified integrations with popular enterprise systems

3. Available Agent Categories

Agents in the marketplace are organized by business function and industry:

3.1 By Business Function

- Operations & Maintenance: Asset monitoring, predictive maintenance, work order automation
- Customer Service: Intelligent support, ticket routing, response automation
- Finance & Accounting: Invoice processing, anomaly detection, compliance monitoring
- Supply Chain: Demand forecasting, inventory optimization, logistics coordination
- Human Resources: Onboarding automation, compliance tracking, workforce analytics
- IT Operations: Incident management, change automation, capacity planning
- Sales & Marketing: Lead scoring, pipeline management, campaign optimization
- Legal & Compliance: Contract analysis, regulatory monitoring, risk assessment

3.2 By Industry

- Manufacturing: Production optimization, quality control, equipment effectiveness

- Energy & Utilities: Grid management, asset health, demand response
- Healthcare: Patient flow, resource scheduling, compliance
- Financial Services: Risk management, fraud prevention, regulatory reporting
- Retail & Consumer: Inventory management, customer experience, pricing
- Logistics & Transportation: Fleet management, route optimization, delivery tracking

4. How to Access Marketplace Agents

Marketplace agents are deployed through the Aimyze team:

1. Browse available agents in the marketplace catalog
2. Contact your account manager to discuss fit for your use case
3. Aimyze team assesses requirements and proposes configuration
4. Agent is deployed and configured by Aimyze implementation team
5. Training and handover to your operations team

5. Agent Customization

Marketplace agents can be customized to your specific needs:

- Business rule configuration to match your processes
- Integration with your specific systems
- Threshold and alert tuning
- Workflow customization
- Branding and terminology alignment

Customization is performed by the Aimyze team during deployment.

6. Quality & Certification

All marketplace agents undergo rigorous quality assurance:

- Functional testing across diverse scenarios
- Performance testing for enterprise scale
- Security review and vulnerability assessment
- Documentation and support readiness
- Customer reference validation

7. Future: Partner Contributions

We are building a partner ecosystem for the marketplace:

7.1 Planned Capabilities

- Certified partners can develop and publish agents
- Industry experts can contribute domain-specific solutions
- System integrators can offer specialized integrations

- Revenue sharing model for partner-developed agents

7.2 Timeline

The partner contribution program is targeted for launch within the next 12 months. Interested partners can register for early access by contacting partners@aimyze.com.

8. Pricing

Marketplace agent pricing:

- Included Agents: Base agents included in subscription tier
- Premium Agents: Additional pricing for advanced or specialized agents
- Custom Development: Priced based on scope and complexity

Contact your account manager for specific pricing information.

9. Support

Marketplace agents include:

- Full documentation and user guides
- Standard support coverage per subscription tier
- Access to Aimyze technical support
- Regular updates and enhancements
